TESTIMONIAL

SPRING 2018

Ada Amsellem, PhD at UNIGE

The Innosuisse training is a toolbox that provides, through a well-conceptualized and scientific reasoning, a framework to take your ideas out of your mind.

Alberto Rodriguez, Msc at CERN

Before starting the couse, I felt very intimidated by the process of starting a company from my ideas.. After this semester, I feel I have all the competencies to transform my ideas into a running business.

Anh Nguyen, PhD at UNIGE

Innosuisse helped me realize the real life of being entrepreneurship. Thanks to their training I am equipped to start my journey as an entrepreneur.

Brenda Penante, Postdoc at CERN

Coming from pure research in academia, the Innosuisse Business Concept Training course opened my mind to how the "real world" works. Now I feel I have a complete toolkit, both in terms of skills, resources and contacts, to found my start-up.

Jelena Vukajlovic Plestina, Postdoc at EPFL

Beside well covered training sessions topics and very good coaches I really enjoyed to be part of the atmosphere where ideas are being developed and then grow. It was great to learn about very cool technologies and follow the evolution of other projects in the business sense.

Manuel Sanchez Miranda, PhD at UNIGE

Amazing course! You will learn the secrets of launching a startup in Switzerland, polish your business idea, and create an unparalleled network of mentors and colleagues that you can take with you.

Marc Brugarolas, Postdoc at EPFL

I was impressed by the quality of the speakers. Even though the course finishes late and you may feel lazy before assisting I always ended up excited after the lesson learned.

Matthieu Auffret, PhD at EPFL

This was an amazing experience. It feels like a quick version of an MBA. It gave me a great vision of the entrepreneurial environnement. Thank you :-)

Matthieu Bovel, Bsc at EPFL

By challenging us, making us think about important questions and giving us access to talented coaches and useful tools, the Innosuisse business concept training taught us a lot and has unlocked whole new possibilities for our project.

Patrick Myers, MD at UNIGE

The Innosuisse Business Concept course provided the tools to found my startup in a lean, streamlined 4 months course. More importantly, it provided unique opportunities to network and meet our future customers, to learn and pivot quickly to a more sustainable business model.

Samuel Kilchenmann, PhD at EFPL

The business concept training is an amazing program that allows future entrepreneurs to learn and develop all the necessary skills to found your own start-up. In addition, you get in touch with many potential as well as successful start-up founders.

Sanaâ Belayachi, Postdoc at UNIGE

I have started this training program with a broad and confused idea of what I may eventually do with my 12 years of research. Today, I know precisely what to do and I have a quite precise idea of how to implement it regarding the numerous parameters to determine when it comes to start up creation. Definitely there is a before-after Business Concept training program for me. I am grateful to Innosuisse for that.

Sébastien Cajot, PhD at EPFL

Awesome course, very informative, stimulating, inspiring.

Sophia Borowka, Postdoc at CERN

The Innosuisse business concept training course is an incredible opportunity that I can only recommend to anyone who is interested in months of intensive learning. Being challenged in so many different areas of life will automatically lead to an enormous personal growth that no book can ever teach.

William Esposito, Msc at CERN

This training is one of the best of its kind. It most probably reached this level of quality by building on the constant feedback required from the participants and coaches. The trainer's and speakers are brilliant, thrilling but also practical, providing tools that proved to be very efficient. The rythm of training was challenging, but that's still mild compared actually starting a company. I would recommend having a lot of time to dedicate to the training, to be able to get alot out of it. But having all the practice and hands-on training makes it really relevant. I had a great time and this will be very useful to my future ventures. Thanks a lot to Innosuisse, organizers and trainers.

Ranjith Reddy Challa, Msc at UNIL

A holistic entrepreneurship training program and is a must attend for aspiring entrepreneurs and also for anyone who is interested in interdisciplinay learning.

Jordi Mollà Mas, Bsc at UNIL

The program has been my first immersion on the entrepreneurial world. Undoubtedly, it has completely changed my mind in a good way and I am more keen to focus my future in the fascinating start-up world.

Sampath Katakam, Postdoc at CHUV

Being academic fellow, training program helped me to understand the commercial world of pharma and more importantly it fetched me to improve my current project in the lab (cancer biology) with a value added research for patients.

Aleksandra Vancevska, PhD at EPFL

I have enjoyed this course a lot. It provides real life expertise in business planing and development with lectures given by enthusiastic and thorough trainers. I have been able to meet the ecosystem and create a strong network of young enthusiasts that might one day change the way we do things.
