

HASHMARK

Our web service enables you to produce, share and collaborate on rich documents. You describe your content using plain text with a few hashtags, we generate beautifully typeset output in real-time that you can view on and interact with on any device.

Creation of high-quality interactive documents made as easy as tweets.

TEAM MEMBERS

1. Maxime Kjær, EPFL (BSc student),
2. Matthieu Bovel, EPFL (MSc student),
3. Sanket Diwale, EPFL (PhD student).

1 Who are your clients?

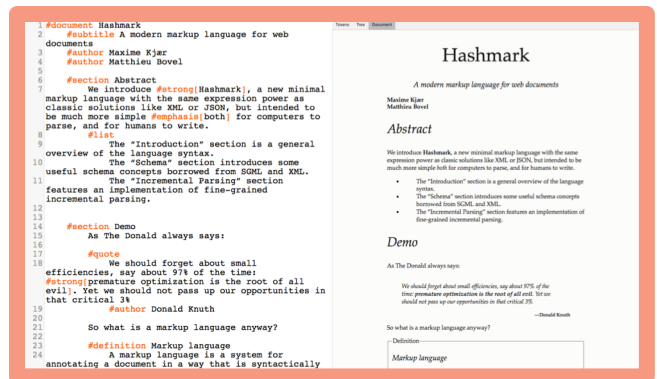

- Academics, mainly through teachers and licence offices.
- Businesses who need custom versions for specific contents.

2 How do you make money?

The basic version of our service is offered for free. In addition, we sell a pro version with collaborative and publishing features as a 4\$ monthly subscription.

3 What gives you credibility?

We are both web developers and computer science students, we developed features of hashmark during our bachelor project.

Next steps

1. What are you going to do in next 6 months
Finish the free version for september. We will then monitor and collect feedback about it. If it works well, we will seek investements and make a crowdfunding to make the pro version.
2. HR needed after the training
Two developers are enough to develop the free version.
3. What kind of support that you are looking for:
We need advice on how our product might be adapted for other usages.

Schweizerische Eidgenossenschaft
Confédération suisse
Confederazione Svizzera
Confederaziun svizra
Swiss Confederation
Innosuisse – Swiss Innovation Agency
