

Team kneot

The current system consists only of a sheet of paper showing the exercises to be done. We innovate with an artificial intelligence that diagnoses the condition of the knee and recommends an optimized treatment to follow. It improves rehabilitation through playful exercises, bringing your patients a better quality recovery with state-of-the-art follow-up.

“The AI that revolution the knee rehabilitation”

TEAM MEMBERS

1. B. Schopfer, HEIG, engineer (BSc)
2. J. Schmid, HEIG, engineer (BSc)
3. P.-E. Delay, HEIG, HEG student (BSc)
4. Y. Fosserat, HEIG, HEG student (BSc)

1 Who are your clients?

Our target customers are hospitals, clinics and pharmacies. They will use our product on their premises or market it by prescription.

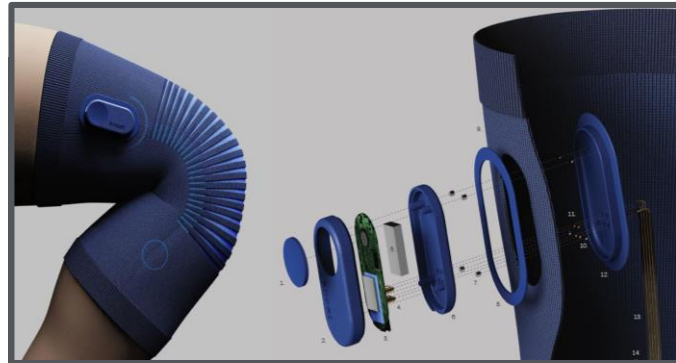

2 How do you make money?

We have three business models

- Monthly rental by subscriptions
- Direct sale
- Leasing sale

3 What gives you credibility?

We have an innovative product that is supported by various recognized hospitals as well as the follow-up of many specialists in various departments

Next steps

1. What are you going to do in next 6 months

Our next objective is to find funding to continue the development of our product, to deepen our market research and to develop relationships with Swiss hospitals.

2. HR needed after the training

We are looking for computer scientists, a graphic designer and an expert in patent and medical certification

3. What kind of support that you are looking for:

We need support in design, artificial intelligence, medical economics, medical research and by specialists in patents and medical certifications
