

Every day, in each healthcare institution there are unpredicted delays, interruptions, loss of time for nurses and insecurity feeling from patients due to a lack of communication between them.

Our digital health assistant connected to informatics systems will improve this communication reducing these delays but also inform nurses on patients' physiological state. Being informed, patients will feel more secure and more satisfied.

“Provide a better communication between Healthcare professionals and patients”

TEAM MEMBERS

1. Julie Dehan, MSc, Psychologist, UNINE
2. Paola Cubillos, MSc, Psychologist, UNINE
3. Adriano Garonna, PhD, Physicist, CERN
4. Marco Daldoss, MSc, Electronics Engineer, CERN
5. Sotirios Sotiriou, PhD, Molecular Biologist, UNIGE

CTI BUSINESS CONCEPT WESTERN SWITZERLAND

- 1 Who are your clients:
 - Private Clinics
 - EMS
- 2 How to make money:
 - Rent our device
 - Rent our services
- 3 What gives you credibility:
 - Multidisciplinary, highly educated and dynamic team

Next steps

1. In the next 6 months we will:
 - Prove our value with a Pilot project
 - Develop our first prototype
 - Fundraise
2. We are looking for:
 - Software developer
