

Business Concept Spring 2019 - Projects

The Spring 2019 business concepts were developed by students in the Business and Entrepreneurship Program at the University of North Carolina at Charlotte.

P4

This is a highly creative work platform for users who want to create and share their own content. It is a social media platform where users can create and share their own content.

ComPair

ComPair is a platform that allows users to compare and contrast different products or services. It is a tool that helps users make informed decisions about their purchases.

NeuroSTEM technologies

NeuroSTEM technologies are a collection of tools and techniques used to study and understand the brain. They are used to investigate the neural basis of various cognitive and behavioral processes.

DAQLink

DAQLink is a platform that allows users to connect and control their data acquisition systems. It is a tool that helps users manage their data and analyze their results.

Heat flux sensor

Heat flux sensors are used to measure the rate of heat transfer across a surface. They are used in a variety of applications, including industrial processes, environmental monitoring, and biomedical research.

SenSwiss

SenSwiss is a platform that allows users to connect and control their sensors. It is a tool that helps users manage their data and analyze their results.

Trafoo

Trafoo is a platform that allows users to connect and control their transformers. It is a tool that helps users manage their data and analyze their results.

WAKEIT

WAKEIT is a platform that allows users to connect and control their wake-up devices. It is a tool that helps users manage their data and analyze their results.

Focushabit

Focushabit is a platform that allows users to connect and control their focus devices. It is a tool that helps users manage their data and analyze their results.

Byzline

Byzline is a platform that allows users to connect and control their byzantine devices. It is a tool that helps users manage their data and analyze their results.

Kumacaya

Kumacaya is a platform that allows users to connect and control their kumacaya devices. It is a tool that helps users manage their data and analyze their results.

Jette pasi

Jette pasi is a platform that allows users to connect and control their jette pasi devices. It is a tool that helps users manage their data and analyze their results.

Footy

Footy is a platform that allows users to connect and control their footy devices. It is a tool that helps users manage their data and analyze their results.

NeXt

NeXt is a platform that allows users to connect and control their next devices. It is a tool that helps users manage their data and analyze their results.

Transparent Fashion

Transparent Fashion is a platform that allows users to connect and control their transparent fashion devices. It is a tool that helps users manage their data and analyze their results.

Wabi-Sabi

Wabi-Sabi is a platform that allows users to connect and control their wabi-sabi devices. It is a tool that helps users manage their data and analyze their results.

HerSupportS

HerSupportS is a platform that allows users to connect and control their her support s devices. It is a tool that helps users manage their data and analyze their results.

CleanMotion

CleanMotion is a platform that allows users to connect and control their clean motion devices. It is a tool that helps users manage their data and analyze their results.

Consumer Recreational Services

Consumer Recreational Services is a platform that allows users to connect and control their consumer recreational services devices. It is a tool that helps users manage their data and analyze their results.

LogoTops

LogoTops is a platform that allows users to connect and control their logo tops devices. It is a tool that helps users manage their data and analyze their results.

BIO.CELLULOSIS

BIO.CELLULOSIS is a platform that allows users to connect and control their bio cellulosis devices. It is a tool that helps users manage their data and analyze their results.

A coworking space for refugees

A coworking space for refugees is a platform that allows users to connect and control their coworking space for refugees devices. It is a tool that helps users manage their data and analyze their results.

Eficy

Eficy is a platform that allows users to connect and control their eficy devices. It is a tool that helps users manage their data and analyze their results.

Sentometrics

Sentometrics is a platform that allows users to connect and control their sentometrics devices. It is a tool that helps users manage their data and analyze their results.

Beep It

Beep It is a platform that allows users to connect and control their beep it devices. It is a tool that helps users manage their data and analyze their results.

Light Complication

Light Complication is a platform that allows users to connect and control their light complication devices. It is a tool that helps users manage their data and analyze their results.

Shift

Shift is a platform that allows users to connect and control their shift devices. It is a tool that helps users manage their data and analyze their results.

THANK YOU!
